TECHNOLOGY USED
• Firebase • Github

EXPERIENCE

The Sparks Foundation | Application Development Intern
Feb 2021 — Mar 2021 |
- Added Google and Facebook authentication.
- Worked with Firebase Authentication and Firebase database.
- Displayed data of user like name, id after sign in

PROJECTS

AvekShaka
Dec 2021 –Feb 2022 | Github Link
Worked with Firebase Authentication, Real-time Database and Storage. Used SQLite for App DB. Android-youtube-player library for showing exercises and games. Geo-Location service for current Location.

NewsFeed
May 2021 –Jun 2021 | Github Link
Shows trending news on daily update. User can also filter news as per choice. Used NewsAPI to fetch data from internet and worked with Recycler Views.

Covi-Eye
Mar 2021 – May 2021 | Github Link
Heart Rate and Oxygen Rate Measurement with camera and Flashlight. Geo Location to fetch current location that user can share with measured result. Emergency option uses push notification to alert other users.

Note App
Jan 2021 –Feb 2021
Notes app allows user to add notes and also delete them.
It uses android architecture components like LiveData, Room, ViewModel.

ACHIEVEMENTS

Year	Result	Event
